Centralize business with a full network solution from Infinity

Improve teamwork and productivity in your office with Infinity

— Services

Infinity Network Solution Inc. works with you to develop the best network solution for your organization by providing the following services:

- Network Assessment
- Consulting
- Network Design
- Equipment Installation

We work with your staff, schedule, and budget to ensure the tasks are completed to industry standards and to your exact specifications.

— Security

Infinity takes the security of your network very seriously. We protect your internal network from Internet hackers and allow secure remote access to your local network from anywhere. The following services ensure complete reliability:

- Security audits
- Security consulting regarding network architecture
- Security safeguards such as Firewalls, Virtual Private Networks (VPN), Intrusion Detection Systems (IDS), and Anti-Virus Management Solutions are implemented

You can rest assured that all reasonable measures are taken to prevent such disruptions as virus attacks, network intrusions, and other network security exposures.

— Support

Infinity offers affordable maintenance plans that include scheduled services for your network as well as emergency support

- On-Site Network Support to manage network hardware and its integration with the network operating systems and other software
- Help Desk Support delivers responsive, personal, cost-effective IT customer service to your end-users
- Remote Network Monitoring Support prevents network problems before they cause downtime, thereby maintaining user productivity
- Remote System Support resolves emergencies via phone support and/or VPN into your system
- Our customers also receive help with release upgrades, user administration, and performance tuning

Powerful management of your computing infrastructure by our certified, experienced systems engineers gives your organization a strong competitive advantage!

— Success!

You and your staff can focus on your business while our certified, experienced systems engineers will support your network.

Our policy: installation is not complete until the customer says that it is complete!

Good networking is essential to business success...
